ABILITIES

<div><div>Defence Line</div><div>While an Astra Militarum Infantry model has the Benefit of Cover as a result of this terrain feature, that model has a 4+ invulnerable save</div></div>
<div><div>Deployment</div><div>When this model is set up, it will consist of 1 platform section, up to 5 shield sections, up to 2 broken shield sections and up to 2 end sections. All sections must be connected to each other to form a continuous defence line; the 2 broken shield sections can be placed either at the end of the defence line, or in the middle of it such that both are within ½" of each other (in this case, these 2 sections count as being connected to each other). All of the sections that have been set up are then treated as a single model for all rules purposes.</div></div>
<div><div>Emplacement Platform</div><div>Friendly Astra Militarum Infantry models can be set up or end any type of move on top of the platform section of this Fortification.</div></div>
<div><div>Fortification</div><div>While an enemy unit is only within Engagement Range of one or more Fortifications from your army:<div><div>- That unit can still be selected as the target of ranged attacks, but each time such an attack is made, unless it is made with a Pistol, subtract 1 from the Hit roll.</div><div>- Models in that unit do not need to take Desperate Escape tests due to Falling Back while Battle-shocked, except for those that will move over enemy models when doing so.</div></div></div></div>
<div><div>Reinforced Cover</div><div>Each time a ranged attack is allocated to a model, if that model is not fully visible to every model in the attacking unit because of this Fortification, that model has the Benefit of Cover against that attack.</div></div>
