ABILITIES

RULES - Infiltrators, Stealth

Demolition Gear

The bearer's unit has the Grenades keyword.

Ratling Battlemutt

Once per battle, when this unit is selected to shoot, it can use this ability. If it does, until the end of the phase, ranged weapons equipped by models in this unit have the **[LETHAL HITS]** ability.

Designer's Note: *Place a Ratling Battlemutt token next to the unit, removing it once this ability has been used.*

Shoot Sharp and Scarper

In your Shooting phase, after this unit has shot, if it is not within Engagement Range of any enemy units, it can make a Normal move as if it were your Movement phase. If it does, until the end of the turn, this unit is not eligible to declare a charge.

WEAPON RULES

Heavy

In your Shooting phase, each time an attack is made with a [HEAVY] weapon, add 1 to the hit roll if all of the following apply to the attacking unit:

- That unit is unengaged.
- That unit was not set up on the battlefield this turn.
- No model in that unit has moved more than 3" this turn.

Lethal Hits

Each time an attack made with a [LETHAL HITS] weapon results in a critical hit, you can choose for that attack to automatically wound the target.

Designer's Note: Choosing to automatically wound the target means that no wound roll is made for that attack. You may decide against this, as it means that attack cannot result in a critical wound and so cannot trigger other abilities such as [DEVASTATING WOUNDS].

Precision

While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.
