ABILITIES

RULES - Infiltrators, Lone Operative, Stealth

Like Fighting a Shadow
In your Shooting phase, after this model has shot, if it is not within Engagement Range of one or more enemy units, it can make a Normal move. If it does, until the end of the turn, this model is not eligible to declare a charge.

One-man Army
Once per turn, in your opponent's Shooting phase, when an enemy unit makes a ranged attack that targets a friendly Regiment unit within 3" of this model, after that enemy unit has shot, this model can shoot as if it were your Shooting phase, but it must target only that enemy unit when doing so, and can only do so if that enemy unit is an eligible target.

WEAPON RULES

Anti

This ability always takes the form [**ANTI**-X Y+]. Each time an attack is made with an [**ANTI**] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

*Example: An attack made with an [**ANTI**-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [**ANTI**-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.*

Pistol

[**PISTOL**] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

Precision

While resolving attacks made with one or more [**PRECISION**] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.
