MELEE WEAPONS

WEAPON	RANGE	A	WS	S	AP	D
Plasma picks	Melee	4	3+	5	-2	1

ABILITIES

RULES - Prioritised Efficiency

Destabilising Quakes

In your Shooting phase, after this unit has shot, select one enemy unit hit by one or more of those attacks made with its tremor shells. That unit must take a Battle-shock test, subtracting 1 from the result.

Geomantic Hunters

Up to twice per battle, in your Shooting phase, when this unit is selected to shoot, it can use this ability. If it does, until the end of the phase, each time a model in this unit makes an attack with its breacher ordnance, you can re-roll the Wound roll.

Guerrilla Adepts
In your Shooting phase, just after this unit is selected to shoot, this unit can use this ability. If it does, select one enemy unit (excluding Monsters and Vehicles). Until the end of the phase, attacks made by models in this unit can only attack that enemy unit (and only if it is an eligible target) and, after resolving those attacks, if one or more of those attacks hit that enemy unit, until the start of your next Shooting phase, that enemy unit is assailed (this simply labels that unit for the purposes of this ability and some Enhancements or Stratagems). If that unit is already assailed, until the start of your next Shooting phase, it is also pinned. While a unit is pinned, subtract 2" from its Move characteristic and subtract 2 from Charge rolls made for it.

WEAPON RULES

Blast

Each time you gather attack dice for a [**BLAST**] weapon, add one additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down). If this ability takes the form [**BLAST** X], each time you gather attack dice for such a weapon, add X additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down) instead.

*Example: If a [**BLAST** 2] weapon with an A characteristic of 3 targets a unit containing 12 models, you would gather four additional attack dice for that weapon (for a total of seven for that weapon).*

Heavy

In your Shooting phase, each time an attack is made with a [**HEAVY**] weapon, add 1 to the hit roll if all of the following apply to the attacking unit:

- That unit is unengaged.
- That unit was not set up on the battlefield this turn.
- No model in that unit has moved more than 3" this turn.

Indirect Fire

Units containing one or more models with an [**INDIRECT FIRE**] weapon can shoot using indirect shooting (10.07).

Pistol

[**PISTOL**] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.
