WEAPON RULES

ANTI
This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.

ASSAULT
Units containing one or more models with an [ASSAULT] weapon can shoot using **assault** shooting (10.05).

BLAST
Each time you gather attack dice for a [BLAST] weapon, add one additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down). If this ability takes the form [BLAST X], each time you gather attack dice for such a weapon, add X additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down) instead.

Example: If a [BLAST 2] weapon with an A characteristic of 3 targets a unit containing 12 models, you would gather four additional attack dice for that weapon (for a total of seven for that weapon).

HEAVY
In your Shooting phase, each time an attack is made with a [HEAVY] weapon, add 1 to the hit roll if all of the following apply to the attacking unit:

- That unit is unengaged.
- That unit was not set up on the battlefield this turn.
- No model in that unit has moved more than 3" this turn.

IGNORES COVER
Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

LANCE
Each time an attack is made with a [LANCE] weapon, if the attacking model's unit made a charge move this turn, add 1 to the wound roll.

LETHAL HITS
Each time an attack made with a [LETHAL HITS] weapon results in a critical hit, you can choose for that attack to automatically wound the target.

Designer's Note: Choosing to automatically wound the target means that no wound roll is made for that attack. You may decide against this, as it means that attack cannot result in a critical wound and so cannot trigger other abilities such as [DEVASTATING WOUNDS].

MELTA
This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.

Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.

PISTOL
[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

PRECISION
While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.

PSYCHIC
Each time an attack is made with a [PSYCHIC] weapon, you can ignore any or all modifiers to that attack's BS or WS characteristic and any or all modifiers to the hit roll. Attacks made with [PSYCHIC] weapons are known as **psychic** attacks (this can be important for the triggering of other rules).

SUSTAINED HITS
This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).

TORRENT
Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

TWIN-LINKED
Each time an attack is made with a [TWIN-LINKED] weapon, you can re-roll the wound roll.

CORE RULES

Battle Focus

If your Army Faction is Asuryani, at the start of the battle round, you receive a number of Battle Focus tokens based on the battle size, as shown below:

- Incursion - 2
- Strike Force - 4
- Onslaught - 6

Each time one of the triggers shown in the Agile Manoeuvres section of your codex occurs, you can spend one Battle focus token to enable the relevant eligible unit to perform that Agile Manoeuvre. A unit is eligible to perform an Agile Manoeuvre if it has this ability and has not already performed an Agile Manoeuvre in the same phase. Unless otherwise stated, you cannot trigger the same Agile Manoeuvre more than once per phase. At the end of the battle round, all unspent Battle Focus tokens are lost.

Crucible

A Character created using Crucible rules has the Crucible ability. Your army may include up to three units with the Crucible ability and these units cannot be given Enhancements.

Deadly Demise 1

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

Infiltrators

During deployment, if every model in a unit has this ability, it can be set up anywhere on the battlefield that is more than 8" horizontally from your opponent's deployment zone and all enemy units.

Lone Operative

Unless part of an attached unit, this unit is not visible to enemy models unless they are within 12" of this unit, and it cannot be targeted by [INDIRECT FIRE] weapons unless the attacking model is within 12" of this unit.

If this ability takes the form Lone Operative X", unless part of an attached unit, this unit is not visible to enemy models unless they are within X" of this unit, and it cannot be targeted by [INDIRECT FIRE] weapons unless the attacking model is within X" of this unit.

Scouts 7"

This ability always takes the form Scouts X". In the Resolve Pre-battle Abilities step, if every model in a unit has this ability, you can do one of the following:

- If that unit is in strategic reserves, you can set up that unit anywhere that is wholly within your deployment zone.

- If that unit is wholly within your deployment zone, it can make a scout move.

- If that unit is embarked within a DEDICATED TRANSPORT that is wholly within your deployment zone, and if every model embarked within that DEDICATED TRANSPORT has the Scouts ability, that DEDICATED TRANSPORT can make a scout move.

Stealth

If every model in a unit has this ability, each time a ranged attack targets that unit, that unit has the benefit of cover against that attack (13.08).
