AUFSTELLUNG

1x Sagitaur (Hull)

Equipped with: HYLas beam cannon, MATR autocannon, Sagitaur missile launcher, Twin bolt cannon, ► L7 missile launcher - blast, ► L7 missile launcher - focused, Armoured wheels

Wargear Options:

- This model can replace its HYLas beam cannon with L7 missile launcher and Sagitaur missile launcher or MATR autocannon.

ABILITIES

Blistering Advance

Units can disembark from this Transport after it has Advanced. Units that do so count as having made a Normal move that phase, and cannot declare a charge in the same turn, but can otherwise act normally in the remainder of the turn.

Firebase Control (Aura)

While a friendly Leagues of Votann Infantry unit is wholly within 6" of this Transport, ranged weapons equipped by models in that Infantry unit have the [sustained hits 1] ability.

Guerrilla Adepts

In your Shooting phase, just after this unit is selected to shoot, this unit can use this ability. If it does, select one enemy unit (excluding Monsters and Vehicles). Until the end of the phase, attacks made by models in this unit can only attack that enemy unit (and only if it is an eligible target) and, after resolving those attacks, if one or more of those attacks hit that enemy unit, until the start of your next Shooting phase, that enemy unit is assailed (this simply labels that unit for the purposes of this ability and some Enhancements or Stratagems). If that unit is already assailed, until the start of your next Shooting phase, it is also pinned. While a unit is pinned, subtract 2" from its Move characteristic and subtract 2 from Charge rolls made for it.

Sagitaur (Transport)

Capacity: This model has a transport capacity of 6 LEAGUES OF VOTANN INFANTRY models. It cannot transport ARTILLERY, EXOARMOUR, EXOFRAME or IRONKIN STEELJACKS models.

At the start of the Declare Battle Formations step, you can select one Hearthkyn Warriors unit from your army that has not been split. If you do, that unit is split into two units, each containing as equal a number of models as possible (when splitting a unit in this way, make a note of which models form each of the two new units). One of these units must start the battle embarked within this Transport; the other can start the battle embarked within another Transport, or it can be deployed as a separate unit.

WEAPON RULES

ASSAULT

Units containing one or more models with an **[ASSAULT]** weapon can shoot using **assault** shooting (10.05).

BLAST

Each time you gather attack dice for a **[BLAST]** weapon, add one additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down). If this ability takes the form **[BLAST X]**, each time you gather attack dice for such a weapon, add X additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down) instead.

*Example: If a **[BLAST 2]** weapon with an A characteristic of 3 targets a unit containing 12 models, you would gather four additional attack dice for that weapon (for a total of seven for that weapon).*

SUSTAINED HITS

This ability always takes the form **[SUSTAINED HITS X]**. Each time an attack made with a **[SUSTAINED HITS]** weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

*Example: An attack made with a **[SUSTAINED HITS 2]** weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the **[SUSTAINED HITS 2]** ability).*

TWIN-LINKED

Each time an attack is made with a **[TWIN-LINKED]** weapon, you can re-roll the wound roll.

CORE RULES

◇ Deadly Demise 1

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

◇ Prioritised Efficiency

If your Army Faction is Leagues of Votann, Leagues of Votann units from your army have one of two abilities: Hostile Acquisition or Fortify Takeover (see below). During the battle, which ability those Leagues of Votann units have will change depending on how many Yield points (YP) you currently have:

- At the start of the battle, your units have Hostile Acquisition until the start of your next Command phase.

- At the end of your Command phase, if you have fewer than 7YP, your units have Hostile Acquisition until the start of your next Command phase.

- At the end of your Command phase, if you have 7YP or more, your units have Fortify Takeover until the start of your next Command phase.

Hostile Acquisition

- Each time a model in this unit makes an attack that targets an enemy unit within range of one or more objective markers, add 1 to the Hit roll.

- You can re-roll Advance and Charge rolls made for this unit.

Fortify Takeover

- Each time a model in this unit makes an attack that targets an enemy unit, if this unit is within range of one or more objective markers you control, add 1 to the Hit roll.

- Each time an attack targets this unit, if the Strength characteristic of that attack is greater than this unit's Toughness characteristic and this unit is not a Vehicle, subtract 1 from the Wound roll.

Yield Points

At the end of each player's Command phase, you gain 1YP if you control one or more objective markers within your deployment zone, and, from the second battle round onwards, you gain 1 additional YP for each of the following conditions you satisfy:

You control one or more objective markers not within your deployment zone.

You control two or more objective markers not within your deployment zone.

You control more objective markers than your opponent.

In your turn, YP gained in this way are always gained before checking which ability Leagues of Votann units from your army have.

Whenever a rule allows you to spend YP, reduce the number of YP you have by that amount (your YP cannot go below 0), otherwise you cannot use that rule.
