► Plasma obliterator - standard BLAST	48"	D6+3	5+	9	-3	3
► Plasma obliterator - supercharge BLAST HAZARDOUS	48"	D6+3	5+	10	-4	4

AUFSTELLUNG

1x Plasma Obliterator [Legends]

Equipped with: ► Plasma obliterator - standard, ► Plasma obliterator - supercharge

ABILITIES

Damaged: 1-6 Wounds Remaining

While this model has 1-6 wounds remaining, each time this model makes an attack, subtract 1 from the Hit roll.

Emergency Plasma Vents

Each time this FORTIFICATION suffers a mortal wound as the result of a failed **Hazardous** test, roll one D6: on a 4+, that wound is not lost.

Fortification

While an enemy unit is only within Engagement Range of one or more Fortifications from your army:

- That unit can still be selected as the target of ranged attacks, but each time such an attack is made, unless it is made with a Pistol, subtract 1 from the Hit roll.
- Models in that unit do not need to take Desperate Escape tests due to Falling Back while Battle-shocked, except for those that will move over enemy models when doing so.

Reinforced Cover

Each time a ranged attack is allocated to a model, if that model is not fully visible to every model in the attacking unit because of this FORTIFICATION, that model has the Benefit of Cover against that attack.

Plasma Obliterator (Transport)

Capacity: This FORTIFICATION has a transport capacity of 20 INFANTRY models. Each model with a Wounds characteristic of 3 or more takes up the space of 2 models. It cannot transport non-CHARACTER models with a Wounds characteristic of 4 or more.

WEAPON RULES

BLAST

Each time you gather attack dice for a **[BLAST]** weapon, add one additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down). If this ability takes the form **[BLAST X]**, each time you gather attack dice for such a weapon, add X additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down) instead.

*Example: If a **[BLAST 2]** weapon with an A characteristic of 3 targets a unit containing 12 models, you would gather four additional attack dice for that weapon (for a total of seven for that weapon).*

HAZARDOUS

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of **[HAZARDOUS]** weapons you selected in the Select Weapons step.

CORE RULES

◆ **Deadly Demise D6**

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

◆ **Firing Deck 10**

This ability always takes the form Firing Deck X. In your Shooting phase, each time this TRANSPORT is selected to shoot, if one or more units are embarked within it, resolve the following sequence:

1. Select up to X models embarked within this TRANSPORT (excluding models whose units have already been selected to shoot this phase).
2. For each selected model, select one of its ranged weapons (excluding [ONE SHOT] weapons).
3. Until this TRANSPORT has resolved all of its attacks, it has all of those selected weapons in addition to its other weapons.
4. Until the end of the turn, units embarked within this TRANSPORT are not eligible to shoot.
