Madcap Artillery

In your Shooting phase, when this unit has shot, if all ranged weapons equipped by each Mek Gunz model in this unit are the same, select one enemy unit hit by those attacks. That enemy unit has the ability below that matches that weapon's name until the start of your next turn:

- Bubblechukka: This unit is wobbled. While a wobbled unit is attacking, its targets have the benefit of cover against those attacks.
- Kustom Mega-kannon: This unit is zapped. While a unit is zapped, that unit has -1 Ld.
- Smash Gun: This unit is smashed. While a unit is smashed, that unit has -2" M.
- Traktor Kannon: This unit is grounded. While a unit is grounded, it cannot take to the skies.

Place five Grot Crew tokens next to each Mek Gun model, removing one each time its Mek Gun model loses a wound (a Mek Gun model itself is considered to represent its final wound).
