MELEE WEAPONS

WEAPON	RANGE	A	WS	S	AP	D
Vindicare combat knife	Melee	4	2+	4	-1	1

ABILITIES

RULES - Assigned Agents, Infiltrators, Lone Operative, Stealth

Dead-shot
When this unit is selected to shoot, until this unit has shot:

- Enemy units do not have Lone Operative.
- Hidden enemy units have +15" detection range.'

Micromelta Rounds
This model's exitus rifle has the [**ANTI**-MONSTER 4+] and [**ANTI**-VEHICLE 4+] abilities.

KEYWORDS: Infantry, Character, Epic Hero, Smoke, Imperium, Vindicare Assassin, Officio Assassinorum

FACTION: Agents of the Imperium **110 PTS**

Shadow Assignment
This model cannot be selected as your WARLORD. If your army faction is AGENTS OF THE IMPERIUM, then during the Declare Battle Formations step, you can replace this model with a different OFFICIO ASSASSINORUM model, provided that the points value of the new model does not exceed the points value of the model it replaced. Your army cannot include duplicates of the same model (i.e. after replacing this model with this rule, your army cannot have more than 1 VINDICARE ASSASSIN, it cannot have more than 1 CULEXUS ASSASSIN, it cannot have more than 1 EVERSOR ASSASSIN and it cannot have more than 1 CALLIDUS ASSASSIN).

Shieldbreaker
Once per battle, when selecting targets for this model's exitus rifle, it can fire a shieldbreaker round. If it does, until the end of the phase, each time this model makes an attack with that weapon, add 1 to the Wound roll and any successful Wound roll scores a Critical Wound.

KEYWORDS: Infantry, Character, Epic Hero, Smoke, Imperium, Vindicare Assassin, Officio Assassinorum

WEAPON RULES

Anti

This ability always takes the form [**ANTI**-X Y+]. Each time an attack is made with an [**ANTI**] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

*Example: An attack made with an [**ANTI**-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [**ANTI**-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.*

Devastating Wounds

Each time an attack made with a [**DEVASTATING WOUNDS**] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by [**DEVASTATING WOUNDS**] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

*Example: An attack made with a [**DEVASTATING WOUNDS**] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.*

Heavy

In your Shooting phase, each time an attack is made with a [**HEAVY**] weapon, add 1 to the hit roll if all of the following apply to the attacking unit:

- That unit is unengaged.

- That unit was not set up on the battlefield this turn.

- No model in that unit has moved more than 3" this turn.

Ignores Cover

Each time an attack is made with an [**IGNORES COVER**] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Pistol

[**PISTOL**] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.

- One or more of its other ranged weapons.

Precision

While resolving attacks made with one or more [**PRECISION**] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.
