## ACTS OF FAITH

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

### GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

### PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

## ASSIGNED AGENTS

If your army Faction is not AGENTS OF THE IMPERIUM, but every model in your army has the IMPERIUM keyword, you can include AGENTS OF THE IMPERIUM units in your army even if they do not have the Faction keyword you selected in the Select Army Faction step. In this case, the maximum number of AGENTS OF THE IMPERIUM units you can include in your army depends on the battle size, as shown below.

Incursion: 1 RETINUE, 1 CHARACTER, 1 REQUISITIONED

Strike Force: 2 RETINUE, 2 CHARACTER, 1 REQUISITIONED

Onslaught: 3 RETINUE, 3 CHARACTER, 2 REQUISITIONED

Note that you can include AGENTS OF THE IMPERIUM DEDICATED TRANSPORT units in such an army as normal, but each unit must start the battle with one or more units embarked within it, or it cannot be deployed for that battle and will count as having been destroyed during the first battle round.

## THE BLOOD OF MARTYRS

### RULE

Each time an ADEPTA SORORITAS model from your army makes an attack, add 1 to the Hit roll if that model's unit is below its Starting Strength, and add 1 to the Wound roll, as well, if that model's unit is Below Half-strength.

## DESPERATE FOR REDEMPTION

### RULE

At the start of your Command phase, you can select one of the following Vows of Atonement to be active for your army until the start of the your next Command phase. You can only select each Vow of Atonement once per battle.

The Path of the Penitent: Add 3" to the Move characteristic of PENITENT model from your army.

Absolution in Battle: Each time a unit from your army is selected to fight, if that units made a Charge move this turn, until the end of the phase, add 1 to the Attacks and Strength characteristics of melee weapons equipped by PENITENT models in that unit.

Death Before Disgrace: Each time a PENITENT model from your army is destroyed by a melee attack, if that model has not fought this phase, roll one D6. On a 2+, do not remove it from play; the destroyed model can fight after the attacking unit has finished making its attacks, and is then removed from play.

## FERVENT PURGATION

### RULE

Ranged weapons equipped by ADEPTA SORORITAS models from your army have the [ASSAULT] ability, and each time an attack made with such a weapon targets a unit within 6", add 1 to the Strength characteristic of that attack.

## SACRED RITES

### RULE

Each Adepta Sororitas unit from your army can perform up to two Acts of Faith per phase, instead of just one.

## RIGHTEOUS PURPOSE

### RULE

In your Command phase, you can select up to 3 Adepta Sororitas units from your army (including units that are embarked within Transports), until the start of your next Command phase, those units are Righteous. While a unit is Righteous:

- Add 1" to the Move characteristic of models in that unit.
- Improve the Leadership characteristic of models in that unit by 1.
- Improve the Weapon Skill and Ballistic Skill characteristics of weapons equipped by Battle Sisters Squad, Celestian Insidiants, Celestian Sacresants and Paragon Warsuits models in that unit by 1.

## KEYWORDS

### RULE

While a Celestian Sacresants unit from your army is not Battle-shocked, add 1 to the Objective Control characteristic of Celestian Sacresants models in that unit.

## ENHANCEMENTS

### Blade of Saint Ellynor

15 pts

ADEPTA SORORITAS model only. Improve the Strength and Armour Penetration characteristics of the bearer's melee weapons by 1, and those weapons have the [Precision] ability. In addition, each time the bearer fights, if one or more enemy models is destroyed by those attacks, you gain 1 Miracle dice.

### Divine Aspect

5 pts

ADEPTA SORORITAS model only. In your Movement phase, you can select one enemy unit within 12" of that bearer; that unit must take a Battle-shock test. If that test is failed, you gain 1 Miracle dice.

### Litanies of Faith

10 pts

CANONESS or PALATINE model only. At the start of your Command phase, if the bearer is on the battlefield, take a Leadership test for the bearer. If that test is passed, you gain 1 Miracle dice.

### Triptych of the Macharian Crusade

20 pts

ADEPTA SORORITAS model only. Each time the bearer uses an Act of Faith to substitute a saving throw, that saving throw is successful, irrespective of the value of the Miracle dice used.

## DETACHMENT-REGEL

ADEPTA SORORITAS model only. At the end of your Command phase, if the bearer is on the battlefield, you can re-roll one Miracle dice from your Miracle dice pool and return it to your Miracle dice pool with the new result you rolled. When doing so, if the bearer's unit is below its Starting Strength, you can re-roll up to 3 Miracle dice in this way instead.

## Mantle of Ophelia

20 pts

Canoness or Palatine model only. Each time an attack is allocated to the bearer, change the Damage characteristic of that attack to 1.

## Sainly Example

10 pts

ADEPTA SORORITAS model only. When the bearer is destroyed, you gain an additional D3 Miracle dice.

## Through Suffering, Strength

25 pts

Adepta Sororitas model only. Add 1 to the Attacks, Strength and Damage characteristics of the bearer's melee weapons. If the bearer has lost one or more wounds, add 2 to the Attacks, Strength and Damage characteristics of the bearer's melee weapons instead.

## DETACHMENT-REGEL

Each time an ADEPTA SORORITAS model from your army makes an attack, add 1 to the Hit roll if that model's unit is below its Starting Strength, and add 1 to the Wound roll as well if that model's unit is Below Half-strength.

## ENHANCEMENTS

### Catechism of Divine Penitence

15 pts

CANONESS, PALATINE, or MINISTORUM PRIEST model only. The bearer gains the PENITENT keyword.

### Psalm of Righteous Judgement

20 pts

ADEPTA SORORITAS model only. While the bearer is on the battlefield, each time an enemy unit is destroyed by a PENITENT unit from your army, you can discard 1 Miracle dice to gain 1 Miracle dice showing a value of 6.

### Refrain of Enduring Faith

15 pts

PENITENT model only. While the bearer is leading a unit, models in that unit have a 5+ invulnerable save.

### Verse of Holy Piety

15 pts

PENITENT model only. Once per battle, at the start of the battle round, select one Vow of Atonement. Until the start of the next battle round, that Vow of Atonement is active for the bearer's unit in addition to any that is active for your army, even if you have already selected that Vow of Atonement this battle.

## DETACHMENT-REGEL

FACTION RULES

**Acts of Faith**

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

**GAINING MIRACLE DICE**

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

**PERFORMING AN ACT OF FAITH**

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

**Leader**

Before the battle, in the Muster Armies step, for each leader and support unit in your army, you can select one friendly bodyguard unit that unit can lead. That unit will then lead that bodyguard unit for the battle and form an attached unit with it. Unless otherwise stated, each bodyguard unit can only have one leader unit and one support unit attached to it.

WEAPON ABILITIES

**Sustained Hits**

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).

The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.<br><br>PERFORMING AN ACT OF FAITH<br>Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll: <ul style="list-style-type: none"><li>• Advance roll</li><li>• Battle-shock test</li><li>• Charge roll</li><li>• Damage roll</li><li>• Hit roll</li><li>• Saving throw</li><li>• Wound roll</li></ul> |

ABILITIES

**Cherub**

Once per battle, after this unit has performed an Act of Faith, you gain 1 Miracle dice.

**Defenders of the Faith**

At the end of your Command phase, if this unit is within range of an objective marker you control, that objective marker remains under your control, even if you have no models within range of it, until your opponent controls it at the start or end of any turn.

**Simulacrum Imperialis**

At the end of your Command phase, for each objective marker you control that has one or more units from your army with this ability within range of it, roll one D6: on a 4+, you gain 1 Miracle dice showing a value equal to that result.

WEAPON ABILITIES

**Anti**

This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

*Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.*

**Assault**

Units containing one or more models with an [ASSAULT] weapon can shoot using **assault** shooting (10.05).

Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.  
Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.  
*Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.*

Hazardous

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

Heavy

In your Shooting phase, each time an attack is made with a [HEAVY] weapon, add 1 to the hit roll if all of the following apply to the attacking unit:

- That unit is unengaged.
- That unit was not set up on the battlefield this turn.
- No model in that unit has moved more than 3" this turn.

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.  
*Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.  
Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

Precision

While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.

Rapid Fire

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).

Sustained Hits

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).

Torrent

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

**GAINING MIRACLE DICE**

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

**PERFORMING AN ACT OF FAITH**

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

Null Rod

Models in the bearer's unit have the Feel No Pain 4+ ability against mortal wounds and Psychic Attacks.

Rod of Office

Each time a model in the bearer's unit makes an attack, re-roll a Hit roll of 1.

Sacred Command

Once per battle round, one unit from your army with this ability can use it when its unit is targeted with a Stratagem. If it does, reduce the CP cost of that use of that Stratagem by 1CP.

The Emperor's Grace

Once per battle, at the start of any phase, this model can use this ability. If it does, until the end of the phase, this model has a 2+ invulnerable save.

Leader

This unit can be attached to the following units: BATTLE SISTERS SQUAD, CELESTIAN INSIDIANTS, CELESTIAN SACRESANTS, CRUSADERS, DOMINION SQUAD, RETRIBUTOR SQUAD, SISTERS NOVITIATE SQUAD

WEAPON ABILITIES

Anti

This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.

Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.

Hazardous

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Lethal Hits

Each time an attack made with a [LETHAL HITS] weapon results in a critical hit, you can choose for that attack to automatically wound the target.

Designer's Note: Choosing to automatically wound the target means that no wound roll is made for that attack. You may decide against this, as it means that attack cannot result in a critical wound and so cannot trigger other abilities such as [DEVASTATING WOUNDS].

Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.

Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.

One Shot

Each weapon with this ability can only be selected to make attacks with once per battle.

If a destroyed model is returned to a unit, all of its [ONE SHOT] weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.

If a new unit is added to an army, all [ONE SHOT] weapons in that unit can be selected to make attacks with once per battle.

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

**Rites of Castigation**  
In your Shooting phase, after this model has shot, select one enemy unit hit by one or more of those attacks. Until the end of the turn, each time a friendly Adepta Sororitas unit makes a ranged attack that targets that enemy unit, improve the Armour Penetration characteristic of that attack by 1. The same enemy unit can only be affected by this ability once per turn.

WEAPON ABILITIES

**Blast**  
Each time you gather attack dice for a **[BLAST]** weapon, add one additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down). If this ability takes the form **[BLAST X]**, each time you gather attack dice for such a weapon, add X additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down) instead.  
*Example: If a **[BLAST 2]** weapon with an A characteristic of 3 targets a unit containing 12 models, you would gather four additional attack dice for that weapon (for a total of seven for that weapon).*

**Ignores Cover**  
Each time an attack is made with an **[IGNORES COVER]** weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

**One Shot**  
Each weapon with this ability can only be selected to make attacks with once per battle.  
If a destroyed model is returned to a unit, all of its **[ONE SHOT]** weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.  
If a new unit is added to an army, all **[ONE SHOT]** weapons in that unit can be selected to make attacks with once per battle.

Rapid Fire

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).

Sustained Hits

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).

Twin-linked

Each time an attack is made with a [TWIN-LINKED] weapon, you can re-roll the wound roll.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

Deadly Demise D3

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

*Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

ABILITIES

**Attached Unit**

If a Character unit from your army can be attached to a Dominion Squad unit, it can be attached to this unit instead.

**Denuncia Oratory**

Each time the bearer's unit's quarry is destroyed, you can select a new unit from your opponent's army to be its quarry.

**Rituale Nullificatus**

Models in this unit have the Feel No Pain 4+ ability against Psychic Attacks and mortal wounds.

**Simulacrum Imperialis**

At the end of your Command phase, for each objective marker you control that has one or more units from your army with this ability within range of it, roll one D6: on a 4+, you gain 1 Miracle dice showing a value equal to that result.

**Virtue of Intolerance**

At the start of the battle, select one unit from your opponent's army to be this unit's quarry. Each time a model in this unit makes an attack that targets its quarry, that attack has the [Precision] ability and you can re-roll the Hit roll. This ability can be used even if this unit is embarked within a Transport.

WEAPON ABILITIES

**Anti**

This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

*Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.*

Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

*Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.*

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Lethal Hits

Each time an attack made with a [LETHAL HITS] weapon results in a critical hit, you can choose for that attack to automatically wound the target.

*Designer's Note: Choosing to automatically wound the target means that no wound roll is made for that attack. You may decide against this, as it means that attack cannot result in a critical wound and so cannot trigger other abilities such as [DEVASTATING WOUNDS].*

Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.

*Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.

Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

ABILITIES

Holy Judgement

At the start of your Shooting phase, select one enemy unit within 12" of and visible to this unit's Ephrael Stern model. That unit must take a Battle-shock test, subtracting 2 from the result if it is a Chaos unit. If the test is failed, that enemy unit suffers 3 mortal wounds.

Mysterious Saviours

You can target this unit with the Heroic Intervention stratagem, regardless of any other uses of that stratagem this phase. If you do:

- That use is -1 CP.
- That use does not prevent any uses of that stratagem on other units this phase.

WEAPON ABILITIES

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

ABILITIES

Cherub

Once per battle, after this unit has performed an Act of Faith, you gain 1 Miracle dice.

Holy Vanguard

If this unit has a Leader unit attached to it during the Declare Battle Formations step and this unit starts the battle embarked within a Transport, that Leader unit gains the Scouts 6" ability.

Righteous Awareness

In your opponent's Movement phase, if an enemy unit ends a move within 8" of this unit, if this unit is not within Engagement Range of one or more enemy units it can make a Normal move of up to D6".

Simulacrum Imperialis

At the end of your Command phase, for each objective marker you control that has one or more units from your army with this ability within range of it, roll one D6: on a 4+, you gain 1 Miracle dice showing a value equal to that result.

WEAPON ABILITIES

Anti

This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.

Assault

Units containing one or more models with an [ASSAULT] weapon can shoot using **assault** shooting (10.05).

Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.

Hazardous

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.  
*Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.  
Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:  
- One or more of its [CLOSE-QUARTERS] weapons.  
- One or more of its other ranged weapons.

Precision

While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.

Rapid Fire

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.  
*Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).*

Torrent

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

Scouts 6"

This ability always takes the form Scouts X". In the Resolve Pre-battle Abilities step, if every model in a unit has this ability, you can do one of the following:

- If that unit is in strategic reserves, you can set up that unit anywhere that is wholly within your deployment zone.
- If that unit is wholly within your deployment zone, it can make a scout move.
- If that unit is embarked within a DEDICATED TRANSPORT that is wholly within your deployment zone, and if every model embarked within that DEDICATED TRANSPORT has the Scouts ability, that DEDICATED TRANSPORT can make a scout move.

ABILITIES

**Damaged: 1-4 Wounds Remaining**

While this model has 1-4 wounds remaining, each time this model makes an attack, subtract 1 from the Hit roll.

**Devastating Refrain**

In your Shooting phase, after this model has shot, if one or more of those attacks made with an **Indirect Fire** weapon scored a hit against an enemy unit, that unit must take a Battle-shock test. Each time such an attack destroys an enemy model that has the Deadly Demise ability, the model's Deadly Demise ability inflicts mortal wounds on a D6 roll of 5+ instead of a 6.

WEAPON ABILITIES

**Blast**

Each time you gather attack dice for a **[BLAST]** weapon, add one additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down). If this ability takes the form **[BLAST X]**, each time you gather attack dice for such a weapon, add X additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down) instead.

*Example: If a **[BLAST 2]** weapon with an A characteristic of 3 targets a unit containing 12 models, you would gather four additional attack dice for that weapon (for a total of seven for that weapon).*

**Ignores Cover**

Each time an attack is made with an **[IGNORES COVER]** weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

**Indirect Fire**

Units containing one or more models with an **[INDIRECT FIRE]** weapon can shoot using indirect shooting (10.07).

**One Shot**

Each weapon with this ability can only be selected to make attacks with once per battle.

If a destroyed model is returned to a unit, all of its **[ONE SHOT]** weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.

If a new unit is added to an army, all **[ONE SHOT]** weapons in that unit can be selected to make attacks with once per battle.

Sustained Hits

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

*Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).*

FACTION RULES

CORE RULES

Deadly Demise D3

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

*Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

ABILITIES

CORE - Support

- Litany of Deeds**

Each time you gain a Miracle dice as the result of a friendly ADEPTA SORORITAS unit or model being destroyed, if that unit or model was destroyed within 12" of this model, you can re-roll the result of that Miracle dice before adding it to your Miracle dice pool.
- Stanchion of Holy Martyrs**

While this model is leading a unit, models in that unit have a Save characteristic of 2+ and a 4+ invulnerable save.
- Leader**

This model can be attached to the following units: BATTLE SISTERS SQUAD, CELESTIAN INSIDIANTS, CELESTIAN SACRESANTS, CRUSADERS, DOMINION SQUAD, RETRIBUTOR SQUAD

WEAPON ABILITIES

- Assault**

Units containing one or more models with an [ASSAULT] weapon can shoot using **assault** shooting (10.05).
- Pistol**

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

  - One or more of its [CLOSE-QUARTERS] weapons.
  - One or more of its other ranged weapons.
- Rapid Fire**

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

*Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).*

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

Support

Before the battle, in the Muster Armies step, for each leader and support unit in your army, you can select one friendly bodyguard unit that unit can lead. That unit will then lead that bodyguard unit for the battle and form an attached unit with it.

Unless otherwise stated, each bodyguard unit can only have one leader unit and one support unit attached to it.

ABILITIES

**Purge and Cleanse**  
In your Shooting phase, after this model has shot, select one enemy unit hit by one or more of those attacks. Until the end of the phase, that enemy unit cannot have the Benefit of Cover.

**Transport**  
This model has a transport capacity of 6 ADEPTA SORORITAS INFANTRY models. It cannot transport JUMP PACK models or the Triumph of Saint Katherine.  
  
At the start of the Declare Battle Formations step, you can select one BATTLE SISTERS SQUAD, DOMINION SQUAD or SISTERS NOVITIATE SQUAD from your army. If you do, that unit is split into two units, each containing as equal a number of models as possible (when splitting a unit in this way, make a note of which models form each of the two new units. If you are splitting a unit that has the Cherub ability, only one of the new units can use that ability during the battle – make a note of which of the new units this will be). One of these units must start the battle embarked within this TRANSPORT; the other can start the battle embarked within another TRANSPORT, or it can be deployed as a separate unit.

WEAPON ABILITIES

**Ignores Cover**  
Each time an attack is made with an **IGNORES COVER** weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

**Melta**  
This ability always takes the form **[MELTA X]**. Each time a model makes an attack with a **[MELTA]** weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.  
*Example: A model targets a unit that is within half range of a **[MELTA 2]** weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

One Shot

Each weapon with this ability can only be selected to make attacks with once per battle.

If a destroyed model is returned to a unit, all of its **[ONE SHOT]** weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.

If a new unit is added to an army, all **[ONE SHOT]** weapons in that unit can be selected to make attacks with once per battle.

Sustained Hits

This ability always takes the form **[SUSTAINED HITS X]**. Each time an attack made with a **[SUSTAINED HITS]** weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

*Example: An attack made with a **[SUSTAINED HITS 2]** weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the **[SUSTAINED HITS 2]** ability).*

Torrent

Each time an attack is made with a **[TORRENT]** weapon, that attack automatically hits the target.

Twin-linked

Each time an attack is made with a **[TWIN-LINKED]** weapon, you can re-roll the wound roll.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw

CORE RULES

Deadly Demise D3

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

*Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

Laud Hailer

Once per battle, at the start of any phase, you can select one friendly Adepta Sororitas unit that is Battle-shocked and within 12" of this model. That unit is no longer Battle-shocked.

Sacred Devotions

Each time this unit performs an Act of Faith, the value of one of the Miracle dice used in that Act of Faith is first changed to a 4.

Shield of the Righteous

Models in this unit have a 4+ invulnerable save.

Unflinching Determination

While this model is leading a unit, add 1 to the Objective Control characteristic of models in that unit.

Leader

This model can be attached to the following units: Seraphim Squad, Zephyrim Squad

WEAPON ABILITIES

Anti

This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.

Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.

Hazardous

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Lethal Hits

Each time an attack made with a [LETHAL HITS] weapon results in a critical hit, you can choose for that attack to automatically wound the target.

Designer's Note: Choosing to automatically wound the target means that no wound roll is made for that attack. You may decide against this, as it means that attack cannot result in a critical wound and so cannot trigger other abilities such as [DEVASTATING WOUNDS].

Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.

Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.

One Shot

Each weapon with this ability can only be selected to make attacks with once per battle.

If a destroyed model is returned to a unit, all of its [ONE SHOT] weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.

If a new unit is added to an army, all [ONE SHOT] weapons in that unit can be selected to make attacks with once per battle.

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

Precision

While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.

Rapid Fire

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).

Sustained Hits

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).

Torrent

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

Twin-linked

Each time an attack is made with a [TWIN-LINKED] weapon, you can re-roll the wound roll.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

Deep Strike

Each time this unit makes an ingress move (20.04), if every model in this unit has this ability, it can be set up anywhere on the battlefield that is more than 8" horizontally from all enemy units, even if that is within your opponent's deployment zone.

Leader

Before the battle, in the Muster Armies step, for each leader and support unit in your army, you can select one friendly bodyguard unit that unit can lead. That unit will then lead that bodyguard unit for the battle and form an attached unit with it. Unless otherwise stated, each bodyguard unit can only have one leader unit and one support unit attached to it.

ABILITIES

Judged for Execution

At the end of your Movement phase, you can select one enemy unit within 18" of and visible to this model. Until the start of your next Command phase, each time a friendly Adepta Sororitas model makes an attack that targets that enemy unit, that attack has the [LETHAL HITS] ability.

Righteous Denunciation

At the start of the Fight phase, each enemy unit within 6" of this model must take a Battle-shock test, subtracting 1 from that test.

WEAPON ABILITIES

Extra Attacks

Each time a unit containing one or more models with an [EXTRA ATTACKS] weapon fights, those models will make attacks with those weapons in addition to any others. In the Select Weapons step (04.01), for each of those models, you must select:

- All of that model's [EXTRA ATTACKS] weapons.
- One of that model's other melee weapons, if possible.

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.

Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.

Sustained Hits

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).

Torrent

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

CORE RULES

Deadly Demise 1

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

*Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

Feel No Pain 5+

This ability always takes the form Feel No Pain X+. Each time a model with this ability would lose a wound, roll one D6: on an X+, that wound is not lost.

**Laud Hailer**  
Once per battle, at the start of any phase, you can select one friendly Adepta Sororitas unit that is Battle-shocked and within 12" of this model. That unit is no longer Battle-shocked.

**Sacred Command**  
Once per battle round, one unit from your army with the ability can be targeted with a Stratagem for OCP, even if another unit from your army has already been targeted with that Stratagem this phase.

**Shield of the Righteous**  
Models in this unit have a 4+ invulnerable save.

**Unflinching Determination**  
While this model is leading a unit, add 1 to the Objective Control characteristic of models in that unit.

**Leader**  
This model can be attached to the following units: Seraphim Squad, Zephyrim Squad

WEAPON ABILITIES

**Anti**  
This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.  
*Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.*

**Devastating Wounds**  
Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.  
Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.  
*Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.*

**Hazardous**  
Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

**Ignores Cover**  
Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

**Lethal Hits**  
Each time an attack made with a [LETHAL HITS] weapon results in a critical hit, you can choose for that attack to automatically wound the target.  
*Designer's Note: Choosing to automatically wound the target means that no wound roll is made for that attack. You may decide against this, as it means that attack cannot result in a critical wound and so cannot trigger other abilities such as [DEVASTATING WOUNDS].*

**KEYWORDS:** Character, Infantry, Grenades, Imperium, Canoness, Militant Commander, Crucible, Sororitas Character, Leader  
**FACTION KEYWORDS:** Adepta Sororitas

**Melta**  
This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.  
*Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

**One Shot**  
Each weapon with this ability can only be selected to make attacks with once per battle.  
If a destroyed model is returned to a unit, all of its [ONE SHOT] weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.  
If a new unit is added to an army, all [ONE SHOT] weapons in that unit can be selected to make attacks with once per battle.

**Pistol**  
[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.  
Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

**Precision**  
While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.

**Rapid Fire**  
This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.  
*Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).*

**Sustained Hits**  
This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.  
*Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).*

**Torrent**  
Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

**Twin-linked**  
Each time an attack is made with a [TWIN-LINKED] weapon, you can re-roll the wound roll.

FACTION RULES

**Acts of Faith**  
If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.  
**GAINING MIRACLE DICE**  
If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:  
- At the start of each turn.  
- Each time an Adepta Sororitas unit from your army is destroyed.  
Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.  
**PERFORMING AN ACT OF FAITH**  
Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

**Deep Strike**  
Each time this unit makes an ingress move (20.04), if every model in this unit has this ability, it can be set up anywhere on the battlefield that is more than 8" horizontally from all enemy units, even if that is within your opponent's deployment zone.

**Leader**  
Before the battle, in the Muster Armies step, for each leader and support unit in your army, you can select one friendly bodyguard unit that unit can lead. That unit will then lead that bodyguard unit for the battle and form an attached unit with it. Unless otherwise stated, each bodyguard unit can only have one leader unit and one support unit attached to it.

CORE RULES

Deadly Demise 1

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

*Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

Feel No Pain 5+

This ability always takes the form Feel No Pain X+. Each time a model with this ability would lose a wound, roll one D6: on an X+, that wound is not lost.

### ABILITIES

CORE - Leader

#### Abdess Sanctorum

While this model is leading a unit, each time a model in that unit makes an attack, you can re-roll the Hit roll and you can re-roll the Wound roll.

#### Righteous Repugnance

Each time this model's unit is selected to shoot or fight, you can discard 1 Miracle dice. If you do, until the end of the phase, add 3 to the Attacks characteristic of Fidelis and the Lance of Illumination. Each time an enemy unit is destroyed by this model, you gain 1 Miracle dice.

#### Leader

This model can be attached to the following unit:

- Paragon Warsuits

### WEAPON ABILITIES

#### Blast

Each time you gather attack dice for a **[BLAST]** weapon, add one additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down). If this ability takes the form **[BLAST X]**, each time you gather attack dice for such a weapon, add X additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down) instead.

*Example: If a **[BLAST 2]** weapon with an A characteristic of 3 targets a unit containing 12 models, you would gather four additional attack dice for that weapon (for a total of seven for that weapon).*

#### Devastating Wounds

Each time an attack made with a **[DEVASTATING WOUNDS]** weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by **[DEVASTATING WOUNDS]** weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

*Example: An attack made with a **[DEVASTATING WOUNDS]** weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.*

Sustained Hits

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.  
*Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

Rapid Fire

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.  
*Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).*

Sustained Hits

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.  
*Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).*

Torrent

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

Deadly Demise 1

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

*Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

Feel No Pain 5+

This ability always takes the form Feel No Pain X+. Each time a model with this ability would lose a wound, roll one D6: on an X+, that wound is not lost.

Fury of the Righteous

While this model is leading a unit, weapons equipped by models in that unit have the [Lethal Hits] ability.

Laud Hailer

Once per battle, at the start of any phase, you can select one friendly Adepta Sororitas unit that is Battle-shocked and within 12" of this model. That unit is no longer Battle-shocked.

Shield of the Righteous

Models in this unit have a 4+ invulnerable save.

Unflinching Determination

While this model is leading a unit, add 1 to the Objective Control characteristic of models in that unit.

Leader

This model can be attached to the following units: Seraphim Squad, Zephyrim Squad

WEAPON ABILITIES

Anti

This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.

Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.

Hazardous

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Lethal Hits

Each time an attack made with a [LETHAL HITS] weapon results in a critical hit, you can choose for that attack to automatically wound the target.

Designer's Note: Choosing to automatically wound the target means that no wound roll is made for that attack. You may decide against this, as it means that attack cannot result in a critical wound and so cannot trigger other abilities such as [DEVASTATING WOUNDS].

**KEYWORDS:** Character, Grenades, Imperium, Crucible, Vehicle, Walker, Reliquant Knight, Paragon Warsuits, Sororitas Character, Leader  
**FACTION KEYWORDS:** Adepta Sororitas

**Melta**  
This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.  
*Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

**One Shot**  
Each weapon with this ability can only be selected to make attacks with once per battle.  
If a destroyed model is returned to a unit, all of its [ONE SHOT] weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.  
If a new unit is added to an army, all [ONE SHOT] weapons in that unit can be selected to make attacks with once per battle.

**Pistol**  
[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.  
Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:  
- One or more of its [CLOSE-QUARTERS] weapons.  
- One or more of its other ranged weapons.

**Precision**  
While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.

**Rapid Fire**  
This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.  
*Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).*

**Sustained Hits**  
This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.  
*Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).*

**Torrent**  
Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

**Twin-linked**  
Each time an attack is made with a [TWIN-LINKED] weapon, you can re-roll the wound roll.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

Deep Strike

Each time this unit makes an ingress move (20.04), if every model in this unit has this ability, it can be set up anywhere on the battlefield that is more than 8" horizontally from all enemy units, even if that is within your opponent's deployment zone.

Leader

Before the battle, in the Muster Armies step, for each leader and support unit in your army, you can select one friendly bodyguard unit that unit can lead. That unit will then lead that bodyguard unit for the battle and form an attached unit with it. Unless otherwise stated, each bodyguard unit can only have one leader unit and one support unit attached to it.

**Pistol**  
[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.  
Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:  
- One or more of its [CLOSE-QUARTERS] weapons.  
- One or more of its other ranged weapons.

**Sustained Hits**  
This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.  
*Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).*

FACTION RULES

**Acts of Faith**

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

**GAINING MIRACLE DICE**

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

**PERFORMING AN ACT OF FAITH**

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

**Feel No Pain 5+**

This ability always takes the form Feel No Pain X+. Each time a model with this ability would lose a wound, roll one D6: on an X+, that wound is not lost.

ABILITIES

Emergency Combat Embarkation

Once per turn, in your opponent's Charge phase, after an enemy unit has selected targets for its charge but before it makes a Charge move, you can select one ADEPTA SORORITAS unit from your army that was selected as a target of that charge. Provided that unit is not within Engagement Range of any enemy units and every model in that unit is within 3" of this TRANSPORT, it can embark within this TRANSPORT.

Transport

This model has a transport capacity of 12 ADEPTA SORORITAS INFANTRY models. It cannot transport JUMP PACK models or the Triumph of Saint Katherine.

WEAPON ABILITIES

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

One Shot

Each weapon with this ability can only be selected to make attacks with once per battle.

If a destroyed model is returned to a unit, all of its [ONE SHOT] weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.

If a new unit is added to an army, all [ONE SHOT] weapons in that unit can be selected to make attacks with once per battle.

Rapid Fire

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).

Torrent

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

CORE RULES

Deadly Demise D3

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

*Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

ABILITIES

Cherubs

Twice per battle, after this unit has performed an Act of Faith, you gain 1 Miracle dice.

Storm of Retribution

Each time a model in this unit makes a ranged attack, re-roll a Hit roll of 1 and re-roll a Wound roll of 1. If such an attack targets an enemy unit that has destroyed one or more Adepta Sororitas units from your army during the battle, add 1 to the Hit roll and add 1 to the Wound roll as well.

WEAPON ABILITIES

Anti

This ability always takes the form [ANTI-X Y+]. Each time an attack is made with an [ANTI] weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

Example: An attack made with an [ANTI-VEHICLE 4+] weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an [ANTI-PSYKER 2+] weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.

Assault

Units containing one or more models with an [ASSAULT] weapon can shoot using **assault** shooting (10.05).

Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.  
Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.  
Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.

Hazardous

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

Heavy

In your Shooting phase, each time an attack is made with a [HEAVY] weapon, add 1 to the hit roll if all of the following apply to the attacking unit:

- That unit is unengaged.
- That unit was not set up on the battlefield this turn.
- No model in that unit has moved more than 3" this turn.

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

**Melta**

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.

*Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

**Pistol**

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

**Precision**

While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.

**Rapid Fire**

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

*Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).*

**Sustained Hits**

This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.

*Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).*

**Torrent**

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

ABILITIES

CORE - Leader

Healing Tears

While this unit contains a Celestine model, in your Command phase, you can return 1 destroyed Geminae Superia model to this unit.

Lifewards

While this unit contains one or more Geminae Superia models, Celestine has the Feel No Pain 4+ ability.

Miraculous Intervention

The first time this unit's Celestine model is destroyed, roll one D6 at the end of the phase. On a 2+, set that Celestine model back up on the battlefield, as close as possible to where it was destroyed and not within Engagement Range of any enemy units, with its full wounds remaining.

Leader

This unit can be attached to the following units: SERAPHIM SQUAD, ZEPHYRIM SQUAD

WEAPON ABILITIES

Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.

Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

FACTION RULES

Acts of Faith

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

Deep Strike

Each time this unit makes an ingress move (20.04), if every model in this unit has this ability, it can be set up anywhere on the battlefield that is more than 8" horizontally from all enemy units, even if that is within your opponent's deployment zone.

Leader

Before the battle, in the Muster Armies step, for each leader and support unit in your army, you can select one friendly bodyguard unit that unit can lead. That unit will then lead that bodyguard unit for the battle and form an attached unit with it. Unless otherwise stated, each bodyguard unit can only have one leader unit and one support unit attached to it.

ABILITIES

Attached Unit

If a Ministorum Priest model from your army with the Leader ability can be attached to a Battle Sisters Squad, it can be attached to this unit instead. If a Ministorum Priest model from your army is attached to this unit during the Declare Battle Formations step, that model gains the Scouts 6" ability.

Cherub

Once per battle, after this unit has performed an Act of Faith, you gain 1 Miracle dice.

Ministorum Sermon

While this unit contains a Ministorum Priest, melee weapons equipped by models in this unit have the [SUSTAINED HITS 1] ability.

Salvationist Medikit

In your Command phase, if the bearer is on the battlefield, you can return up to D3 destroyed models (excluding Character models) to this unit.

Simulacrum Imperialis

At the end of your Command phase, for each objective marker you control that has one or more units from your army with this ability within range of it, roll one D6: on a 4+, you gain 1 Miracle dice showing a value equal to that result.

## WEAPON ABILITIES

### Devastating Wounds

Each time an attack made with a [DEVASTATING WOUNDS] weapon results in a critical wound, the attack sequence for that attack ends and the target unit suffers a number of mortal wounds equal to the D characteristic of that weapon. These are inflicted after resolving any normal damage inflicted by those attacks.

Mortal wounds inflicted by [DEVASTATING WOUNDS] weapons can damage a maximum of one model for each critical wound; any remaining mortal wounds inflicted by that attack are lost.

*Example: An attack made with a [DEVASTATING WOUNDS] weapon with a D characteristic of 3 results in a critical wound against an Intercessor Squad, so inflicts 3 mortal wounds. The first 2 mortal wounds are sufficient to destroy 1 Intercessor model, so the remaining mortal wound is lost.*

### Hazardous

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

### Ignores Cover

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

### Melta

This ability always takes the form [MELTA X]. Each time a model makes an attack with a [MELTA] weapon, if the target unit was within half range of that weapon in the Select Targets step, until the attacking unit's attacks have been resolved, add X to that weapon's D characteristic.

*Example: A model targets a unit that is within half range of a [MELTA 2] weapon with a D characteristic of D6. While resolving those attacks, that weapon has a D characteristic of D6+2.*

### One Shot

Each weapon with this ability can only be selected to make attacks with once per battle.

If a destroyed model is returned to a unit, all of its [ONE SHOT] weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.

If a new unit is added to an army, all [ONE SHOT] weapons in that unit can be selected to make attacks with once per battle.

### Pistol

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

### Precision

While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models visible to one or more of the attacking models, the active player can select one allocation group that contains one of those visible CHARACTER models. If they do, until those attacks are resolved, or until that CHARACTER group is destroyed (whichever happens first), that CHARACTER group is the current allocation group.

### Rapid Fire

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

*Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).*

### Torrent

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can

You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

**Assigned Agents**

If your army Faction is not AGENTS OF THE IMPERIUM, but every model in your army has the IMPERIUM keyword, you can include AGENTS OF THE IMPERIUM units in your army even if they do not have the Faction keyword you selected in the Select Army Faction step. In this case, the maximum number of AGENTS OF THE IMPERIUM units you can include in your army depends on the battle size, as shown below.

Incursion: 1 RETINUE, 1 CHARACTER, 1 REQUISITIONED

Strike Force: 2 RETINUE, 2 CHARACTER, 1 REQUISITIONED

Onslaught: 3 RETINUE, 3 CHARACTER, 2 REQUISITIONED

Note that you can include AGENTS OF THE IMPERIUM DEDICATED TRANSPORT units in such an army as normal, but each unit must start the battle with one or more units embarked within it, or it cannot be deployed for that battle and will count as having been destroyed during the first battle round.

ABILITIES

**Impetuous Fervour**

Impetuous Fervour: Each time a model in this unit makes an attack, re-roll a Hit roll of 1. If the target of that attack is an enemy unit within range of an objective marker, you can re-roll the Hit roll instead.

**Sacred Banner**

You can re-roll Advance and Charge rolls made for the bearer's unit.

**Simulacrum Imperialis**

At the end of your Command phase, for each objective marker you control that has one or more units from your army with this ability within range of it, roll one D6: on a 4+, you gain 1 Miracle dice showing a value equal to that result.

WEAPON ABILITIES

**Assault**

Units containing one or more models with an [ASSAULT] weapon can shoot using **assault** shooting (10.05).

**Hazardous**

Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.

**Ignores Cover**

Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

**Pistol**

[PISTOL] and [CLOSE-QUARTERS] are identical for all rules purposes.

Units containing one or more models with a [CLOSE-QUARTERS] weapon can shoot using close-quarters shooting (10.06). When using another shooting type, for each model in that unit (excluding MONSTER/VEHICLE models), you can only select one of the following to make attacks with:

- One or more of its [CLOSE-QUARTERS] weapons.
- One or more of its other ranged weapons.

**Rapid Fire**

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

*Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).*

**Torrent**

Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.

FACTION RULES

**Acts of Faith**

If your Army Faction is Adepta Sororitas, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

**GAINING MIRACLE DICE**

If your Army Faction is Adepta Sororitas, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an Adepta Sororitas unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice pool.

**PERFORMING AN ACT OF FAITH**

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

CORE RULES

**Infiltrators**

Transport

This model has a transport capacity of 12 ADEPTA SORORITAS INFANTRY models. It cannot transport JUMP PACK models or the TRIUMPH OF SAINT KATHERINE.

WEAPON ABILITIES

One Shot

Each weapon with this ability can only be selected to make attacks with once per battle.

If a destroyed model is returned to a unit, all of its [ONE SHOT] weapons that have already been selected to make attacks with during the battle cannot be selected to make attacks with again.

If a new unit is added to an army, all [ONE SHOT] weapons in that unit can be selected to make attacks with once per battle.

Rapid Fire

This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.

CORE RULES

Deadly Demise D3

This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").

*Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

Firing Deck 2

This ability always takes the form Firing Deck X. In your Shooting phase, each time this TRANSPORT is selected to shoot, if one or more units are embarked within it, resolve the following sequence:

1. Select up to X models embarked within this TRANSPORT (excluding models whose units have already been selected to shoot this phase).
2. For each selected model, select one of its ranged weapons (excluding [ONE SHOT] weapons).
3. Until this TRANSPORT has resolved all of its attacks, it has all of those selected weapons in addition to its other weapons.
4. Until the end of the turn, units embarked within this TRANSPORT are not eligible to shoot.

While a friendly Adepta Sororitas unit is within 6" of this model, each time a model in that unit makes a ranged attack, re-roll a Wound roll of 1.
- Relic of the Matriarch - Simulacrum of the Ebon Chalice (Aura)**  
While a friendly Adepta Sororitas unit is within 6" of this model, that unit can perform up to two Acts of Faith per phase, instead of only one.
- Relic of the Matriarch - The Fiery Heart (Aura)**  
While a friendly Adepta Sororitas unit is within 6" of this model, add 2" to that unit's Move characteristic and add 1 to the Advance and Charge rolls made for that unit.
- Relics of the Matriarchs**  
At the start of the battle round, select up to two of the abilities in the Relics of the Matriarchs section. Until the start of the next battle round, this model has those abilities.
- Solemn Procession**  
Each time you gain 1 Miracle dice at the start of your turn, if this model is on the battlefield, do not roll one D6 to determine the value of that Miracle dice; it has a value of 6.
