Neural Disruption

In your Command phase, select one enemy unit within 12" of this model. That unit must take a Battle-shock test

Psychological Saboteur (Aura)

While an enemy unit is with 12" of this model, if that unit is Battle-shocked:

- Each time a model in that unit makes an attack, subtract 1 from the Hit roll

- Each time a friendly TYRANIDS model makes an attack that targets that unit, add 1 to the Wound roll.

REGELN & KEYWORDS KURZ

Infiltrators During deployment, if every model in a unit has this ability, it can be set up anywhere on the battlefield that is more than 8" horizontally from your opponent's deployment area.

Lone Operative Unless part of an attached unit, this unit is not visible to enemy models unless they are within 12" of this unit, and it cannot be targeted by [INDIRECT FIRE] weapons unless they are within 12" of this unit.

Shadow in the Warp If your Army Faction is TYRANIDS, once per battle, in either player's Command phase, if one or more units from your army with this ability are on the battlefield, you can choose to make a Battle-shock test for each of them.

Stealth If every model in a unit has this ability, each time a ranged attack targets that unit, that unit has the benefit of cover against that attack (13.08).

Synapse If your Army Faction is TYRANIDS, while a TYRANIDS unit from your army is within 6" of one or more friendly SYNAPSE models, that TYRANIDS unit is said to be within Synapse range of those models.

PRECISION While resolving attacks made with one or more [PRECISION] weapons, at the start of the Allocation Order step (05.03), if the target unit contains one or more CHARACTER models, you can choose to make a Battle-shock test for each of them.
