ABILITIES

- Damaged: 1-9 Wounds Remaining**
While this model has 1-9 wounds remaining, subtract 5 from this model's Objective Control characteristic and each time this model makes an attack, subtract 1 from the Hit roll.
- Invulnerable Save (4+*)**
This model has a 4+ invulnerable save against ranged attacks.
- Selfless Protector**
Each time a ranged attack is allocated to an Imperial Knights model from your army, if that model is not fully visible to every model in the attacking unit because of this Knight Defender model, that model has the Benefit of Cover and a 4+ invulnerable save against that attack.
- Warden's Duty (Bondsmen)**
While a model is affected by this ability, each time an attack is allocated to that model, subtract 1 from the Damage characteristic of that attack.

WEAPON ABILITIES

- Blast**
Each time you gather attack dice for a [BLAST] weapon, add one additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down). If this ability takes the form [BLAST X], each time you gather attack dice for such a weapon, add X additional attack dice for every five models that were in the target unit in the Select Targets step (rounding down) instead.
Example: If a [BLAST 2] weapon with an A characteristic of 3 targets a unit containing 12 models, you would gather four additional attack dice for that weapon (for a total of seven for that weapon).
- Hazardous**
Each time a unit is selected to shoot or selected to fight, after that unit has resolved all of its attacks, make a number of hazard rolls (06.03) for that unit equal to the number of [HAZARDOUS] weapons you selected in the Select Weapons step.
- Ignores Cover**
Each time an attack is made with an [IGNORES COVER] weapon, the target cannot have the benefit of cover against that attack (13.08), including from rules that give a model or unit the benefit of cover (e.g. Stealth).

- Rapid Fire**
This ability always takes the form [RAPID FIRE X]. Each time you gather attack dice for a [RAPID FIRE] weapon, add X additional attack dice if the target unit was within half range of that weapon in the Select Targets step.
Example: If a [RAPID FIRE 1] weapon with an A characteristic of 1 targets a unit that is within half range, you would gather one additional attack dice for that weapon (for a total of two for that weapon).
- Sustained Hits**
This ability always takes the form [SUSTAINED HITS X]. Each time an attack made with a [SUSTAINED HITS] weapon results in a critical hit, that attack results in a number of additional hits on the target as denoted by X.
Example: An attack made with a [SUSTAINED HITS 2] weapon results in a critical hit. That attack therefore hits the target three times (once from the critical hit, and twice more from the [SUSTAINED HITS 2] ability).
- Torrent**
Each time an attack is made with a [TORRENT] weapon, that attack automatically hits the target.
- Twin-linked**
Each time an attack is made with a [TWIN-LINKED] weapon, you can re-roll the wound roll.

FACTION RULES

- Bondsman**
Some Imperial Knights models have a Bondsman ability, tagged with the word 'Bondsman'. In your Command phase, one or more models from your army with a Bondsman ability can use that ability. For each one that does, select one friendly Armiger model within 12" of that model (you cannot select an Armiger model that is already being affected by a Bondsman ability). Until the start of your next Command phase, that Armiger model is affected by that Bondsman ability.

CORE RULES

- Deadly Demise D6**
This ability always takes the form Deadly Demise X. Each time a model in this unit is destroyed, after the units embarked within it (if any) have made their emergency disembark moves, roll one D6. On a 6, that model suffers a deadly demise; each unit within 6" of that model suffers a number of mortal wounds denoted by X (if this is a random number, roll separately for each unit within 6").
Example: An Impulsor with a unit of Intercessors embarked within it is destroyed by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an emergency disembark move. Then the roll is made for the Deadly Demise ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.
- Super-Heavy Walker**
Each time a unit with this ability makes a normal, advance or fall-back move:
 - Models in that unit can move through models (including MONSTER/VEHICLE models, but excluding TITANIC models) and can move horizontally through sections of terrain features that are 4" or less in height.
 - Before moving that unit, you can select for all models in that unit to have the MOBILE keyword until that move ends. If you do, when that move ends, roll one D6: on a 1, that unit is battle-shocked.*Designer's Note: Gaining the MOBILE keyword for the duration of a move will enable models in that unit to move horizontally through dense terrain features (13.06).*
