AUFSTELLUNG

1x Parasite of Mortrex (40mm)

Equipped with: Barbed ovipositor, Clawed limbs

ABILITIES

It Itches!

At the start of the Fight phase, select one enemy unit within Engagement Range of this model. That enemy unit must take a Battle-shock test.

Parasitic Infection

Each time an Infantry model is destroyed by an attack made with this model's barbed ovipositor, after this model has finished making its attacks, you can add one new Ripper Swarms unit to your army consisting of D3 models and set it up within 3" of this model. If you do, that Ripper Swarms unit can be set up within Engagement Range of the destroyed model's unit (but not within Engagement Range of any other enemy units).

WEAPON RULES

ANTI

This ability always takes the form **[ANTI-X Y+]**. Each time an attack is made with an **[ANTI]** weapon, if the target unit has the keyword denoted by X, an unmodified wound roll of Y+ is a critical wound.

*Example: An attack made with an **[ANTI-VEHICLE 4+]** weapon against a Vehicle unit will result in a critical wound on an unmodified wound roll of 4+, while an attack made with an **[ANTI-PSYKER 2+]** weapon against a Psyker unit will result in a critical wound on an unmodified wound roll of 2+.*

EXTRA ATTACKS

Each time a unit containing one or more models with an **[EXTRA ATTACKS]** weapon fights, those models will make attacks with those weapons in addition to any others. In the Select Weapons step (04.01), for each of those models, you must select:

- All of that model's **[EXTRA ATTACKS]** weapons.
- One of that model's other melee weapons, if possible.

CORE RULES

◆ Deep Strike

Each time this unit makes an ingress move (20.04), if every model in this unit has this ability, it can be set up anywhere on the battlefield that is more than 8" horizontally from all enemy units, even if that is within your opponent's deployment zone.

◆ Lone Operative

Unless part of an attached unit, this unit is not visible to enemy models unless they are within 12" of this unit, and it cannot be targeted by [INDIRECT FIRE] weapons unless the attacking model is within 12" of this unit.

If this ability takes the form Lone Operative X", unless part of an attached unit, this unit is not visible to enemy models unless they are within X" of this unit, and it cannot be targeted by [INDIRECT FIRE] weapons unless the attacking model is within X" of this unit.

◆ Shadow in the Warp

If your Army Faction is TYRANIDS, once per battle, in either player's Command phase, if one or more units from your army with this ability are on the battlefield, you can unleash the Shadow in the Warp. When you do, each enemy unit on the battlefield must take a Battle-shock test. Each time an enemy unit takes such a Battle-shock test, if it is within 6" of one or more SYNAPSE units from your army, subtract 1 from that test.

◆ Stealth

If every model in a unit has this ability, each time a ranged attack targets that unit, that unit has the benefit of cover against that attack (13.08).

◆ Synapse

If your Army Faction is TYRANIDS, while a TYRANIDS unit from your army is within 6" of one or more friendly SYNAPSE models, that TYRANIDS unit is said to be within Synapse Range of that model and of your army. While a TYRANIDS unit from your army is within Synapse Range of your army:

- Each time that unit takes a Battle-shock test, take that test on 3D6 instead of 2D6.
- Each time a model in that unit makes a melee attack, add 1 to the Strength characteristic of that attack.
